

Instructions on connecting Chromebooks to Wireless Network for Students

1. Select NLM-Student when connecting to a wireless network.
2. You will be presented the following pop-up window. Configure the wireless options as shown below:

The important wireless settings are:

EAP Method = **PEAP**

Phase-2 Authentication = **MSCHAPv2**

Server CA Certificate = **Do Not Check**

They will need to login and authenticate with their Gmail account but without the domain. For example, if the Gmail account is SteveR313@student.nlmusd.org, they would log in as SteveR313

Identity = your Gmail account (without domain). e.g. SteveR313

Password = your Gmail password

3. Click **Connect** and you will then be connected to the "NLM-Student" wireless network.
